

THE TTS CONNECTION

As we enter a new year where it is more important than ever to be able to work efficiently in a remote and digital environment, we want you to know that you can count on TradeTech Solutions to provide quotation, sales analysis, CRM, total order entry and marketing solutions that the manufacture's rep counts on.

But, just as important as the software itself, is the safety and security of your sensitive information. TTS is partnered with www.switch.com/ for our data center solution just like Ebay, AWS, Intel, Citrix and many other fortune 500 companies - <https://www.switch.com/clients/>. Know that your data is always backed up and secure.

Microsoft Integration has launched!

We know that the TTS platform is just one of the tools you need to get the job done. We thought how convenient it would be if you could integrate your Outlook and Gmail programs with your TTS account, allowing you to pull everything from your contacts to quotations into your emails.

A productive working environment is one of the pieces to the puzzle of "success". TTS is the gatekeeper, the central hub for all of your client and supplier information.

Our user interface may be simple, but our technology is advanced.

Quote to Order

Save hours of time by eliminating manual steps!

No more printing

No more typing

No more manual entry

Learn how to seamlessly turn a working quotation into an order with only a few steps. No longer is there a need to manually enter that information again.
